EDUCATION

Aklan State University

2ND YEAR

Bachelor of Science in Information Technology
Major in Software Engineering

EXPERIENCE

Backend AI Engineer Intern

FLYRANK

- Developed a containerized Library REST API with 15+ endpoints for search, pagination, and data aggregation using Java 25, Spring Boot 4.1, and PostgreSQL.
- Automated database schema migrations with Flyway and standardized API error handling through a centralized global exception handler, improving deployment consistency and preventing unhandled application errors across all REST endpoints.

Co-Founder

DEVGUILD

- Led a community of 25+ student developers building real-world software products, following agentic-first and modern workflows.
- Designed and managed Docker-based containerization workflows for 3 internal development groups, reducing deployment and QA turnaround from 7 days to 2-3 days, through standardized Dockerfiles, image registry usage, and Docker Compose setups.

SELECTED PROJECTS

Libro — Library Management System

Java · Spring Boot · PostgreSQL 18 · Docker · Flyway

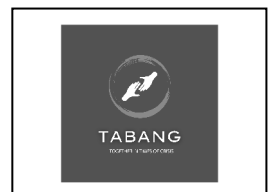

- Developed a containerized Library REST API with 15+ endpoints for search, pagination, and data aggregation using Java 25, Spring Boot 4.1, and PostgreSQL.
- Automated database schema migrations with Flyway and standardized API error handling through a centralized global exception handler, improving deployment consistency and preventing unhandled application errors across all REST endpoints..

Tabang — Flood reporting & response

Incident reporting · Response workflows · Role-based responsibilities

- Connected resident flood reports and requests for help with responder claim-and-resolve workflows and reviewer approval.
- Placed 7th among 25+ teams at UPV KomsaiHack 2026.

FaceLog — Offline Attendance

Python · OpenCV · SQLite · Webcam · CSV

- Registered people from a webcam feed and recorded each recognized person once per attendance session.
- Stored attendance in SQLite and exported session CSV files within a small Python modular monolith.

ACTIVITIES & ACHIEVEMENTS

2nd Place — RSTW Paindis-Indis It Inobasyon OCTOBER 2, 2026 · ABL SPORTS COMPLEX, KALIBO, AKLAN

Poultri, the agritech startup I founded, placed second among eight finalists from across Western Visayas in the RSTW Paindis-Indis It Inobasyon Student Startup Competition. Our team received ₱20,000 and incubation with TechNest TBI.

Most Analytical Programmer Award

JUNE 2026

Recognized during DICT Region VI's Python Programming Essentials Training for strong analytical reasoning and effective problem-solving.

UPV KomsaiHack 2026 Finalist

APRIL 2026

Tabang, our flood reporting and response application for Aklan, placed seventh among more than 25 teams at UPV KomsaiHack 2026.

TECHNICAL SKILLS

Languages: Java (21+), Python (3.x), SQL, Bash

Backend: Spring Boot (3.x), Spring MVC, Spring Data JPA, Spring Security, Hibernate, REST APIs

Databases: PostgreSQL, MySQL, SQLite, Flyway

Cloud & DevOps: Docker, AWS (learning), Linux (Mint / Ubuntu), Git, GitHub, Maven

Testing & Tools: JUnit 5, Mockito, Swagger / OpenAPI, Postman, IntelliJ IDEA, PyCharm
